PROFILE

Computer Engineering student focused on ML integration, DSA and Full-Stack development, with strong foundations in Machine Learning, Mathematics, and System design. Actively seeking Machine Learning / Software Engineering internships.

EXPERIENCE

Chief Marketing Officer – Campus X Connect Aug 2025 – Feb 2026
Led brand strategy and partnerships, expanding outreach across student and corporate ecosystems.

Organization Team – Smart India Hackathon Sep 2024
Coordinated logistics for a national-level hackathon with large participant engagement.

Symposium Team & Speaker – SMLRA Jun 2024 – Oct 2024
Delivered lectures and made projects on ML topics including OCR and sentiment analysis.

PROJECTS

SoleX – Full Stack E-Commerce Platform
Built a scalable footwear marketplace using React, Node.js, MongoDB, and REST APIs with advanced filtering, cart, wishlist, and real-time search features.

TransitX – Bus & Train Ticket Booking System
Engineered a full-stack ticket booking platform using Java, HTML, and CSS, supporting dynamic scheduling, seat allocation logic, and real-time booking workflows with modular backend design and user-centric interface.

OCR System – Document Intelligence Pipeline
Built an OCR-based system using Python and Tesseract/PaddleOCR to extract and structure text from images and documents. Implemented preprocessing techniques and data pipelines to improve extraction accuracy and usability.

Sentimentengine - Sentiment Analysis Model
Developed a machine learning model using Scikit-learn and NLP techniques to classify text sentiment. Built a pipeline for preprocessing, feature extraction, and prediction, enabling real-time sentiment evaluation.

Bank Churn Prediction Model
Built a predictive model using supervised learning to identify customer churn patterns. Applied feature engineering, model evaluation, and optimization techniques to improve prediction accuracy.

TECHNICAL SKILLS

Languages: Python, C, C++, Java, TypeScript
Frameworks: React, Node.js, Flask, Streamlit, Tailwind CSS
Databases: MySQL, PostgreSQL, MongoDB
Python Libraries: PyTorch, TensorFlow, Keras, Pandas, Scikit-learn, Tkinter, Seaborn, XGBoost
Core Concepts: Data Structures and Algorithms, Operating Systems, Computational Thinking, Machine Learning
Tools & APIs: REST APIs, Git, Github, Power BI, Figma, Canva, Blender, Video Editing

EDUCATION

KJSSE, Mumbai

B.Tech Computer Engineering—CGPA: 8.4

IIT Madras

BS Data Science (Foundational Level cleared)

DAV, Pune

HSC (12th)—81%

EIS, Pune

SSC (10th)—96%

CO-SCHOLASTIC ACHIEVEMENTS

Accomplished Mridangamist—Winner of ICMDA & Akhil Bharatiya Sangh

Recognized Percussionist and Pianist at Poona Sangeetha Sabha

National Level Table Tennis Player

COUNCILS & ENGAGEMENT

Palinoia-Classical Music Club

Table Tennis University Team

Illuminati-Head of Content

Maya Somaiya Musical Team

LANGUAGES

English, Hindi, Marathi, Tamil
